BA in Life and Earth Sciences,
Ibnou Al Yassamine High School
09-2020 – 10-2021 | casablanca

🧠 SKILLS

- HTML/CSS/JAVASCRIPT(ES6)
- REACT(REACT ROUTER/CONTEXT API)
- TAILWINDCSS/BOOTSTRAP
- PHP/LARAVEL
- MYSQL
- GIT/GITHUB
- FiGMA
- NODEJS/EXPRESSJS

📂 PROJECTS

Audiophile E-commerce
This full-stack e-commerce application, developed with the MERN stack (MongoDB, Express, React, Node.js), includes user authentication with JWT and secure token management. It includes a dynamic product management system with data imported from a JSON file, a custom payment process and HTTP-only cookies to enhance security against CSRF attacks. This project highlights my skills in full-stack development and implementation of advanced security features.

SPORTS CLUB
This project, which is part of my full-stack developer degree, is a complete sports club management system. It enables club administrators to effectively manage activities and plans with CRUD operations. In addition, members can update their profiles easily.

Portfolio
My portfolio website is a dynamic showcase of my career as a web developer. It is an ongoing project that reflects my skills, experiences and creativity.
